

UNIT 9: PHOTOGRAPHY UNIT PROMOTING TALLIS

By: Dilaxsanan Balakrishnan

I propose to take and edit a series of pictures which can be used to publish on the Thomas Tallis School website or on print like a leaflet. The department I have decided to promote is Product Design. My client, Mr Morgan has requested two specifications that I should stick to, Shallow depth of Field and Black and White. I am planning to focus on the practical side on Product Design as there is more action and it will make Product Design look more interesting. I am going to edit my photographs using Adobe Lightroom instead of Adobe Photoshop. I am looking forward to improving my photography skills and creating a set of images that can be used for school publicity purposes.
